PROFESSIONAL SUMMARY

Principal DevOps Engineer with 10+ years of experience supporting mission-critical production infrastructure within a global fintech organization. Experienced in Linux administration, production operations, incident response, Root Cause Analysis (RCA), automation, CI/CD, Kubernetes, Docker, Terraform, and infrastructure monitoring. Proven ability to troubleshoot complex production issues, maintain highly available systems, and improve operational reliability in 24x7 enterprise environments.

AWS, Google Cloud, Microsoft Azure, Kubernetes, Terraform, RHCSA, and ISC2 Certified, with hands-on cloud experience through certification labs, personal projects, and self-managed environments. Passionate about Site Reliability Engineering (SRE), Infrastructure Automation, AIOps, and building scalable operational solutions.

TECHNICAL SKILLS

Cloud: AWS, Microsoft Azure, Google Cloud Platform (GCP)

Operating Systems: Red Hat Enterprise Linux (RHEL), CentOS, Ubuntu

Containers & DevOps: Kubernetes (CKA), Docker, Jenkins, GitHub Actions, Git, GitBucket, Terraform

Automation: Bash, Python

Monitoring: Dynatrace, Grafana, Nagios, SolarWinds

Networking: TCP/IP, DNS, DHCP, VPN, NAT, VLAN, Cisco Routing & Switching

Tools: Jira, OTRS, Wireshark, tcpdump

PROFESSIONAL EXPERIENCE

Principal Telephony DevOps Engineer

Oct 2014 – Present

i2c Inc – Lahore, Pakistan

Global fintech organization supporting enterprise payment processing and communication platforms.

- Manage and maintain 100+ Red Hat Enterprise Linux production servers supporting mission-critical financial services.
- Build and maintain CI/CD pipelines using Jenkins and GitHub Actions.
- Deploy and manage Docker containers and Kubernetes environments for development and laboratory workloads.
- Automate operational processes using Bash and Python scripting.
- Perform Linux system administration, security patching, system hardening, and performance tuning.
- Monitor enterprise infrastructure using Dynatrace, Grafana, Nagios, and SolarWinds.
- Lead production incident management, troubleshooting, and Root Cause Analysis (RCA) for critical production services.
- Collaborate with Development, QA, Infrastructure, and Operations teams to improve deployment reliability and operational efficiency.
- Support highly available 24x7 production environments with strict SLA requirements.

Network Engineer

Apr 2014 – Oct 2014

Supernet Limited – Lahore, Pakistan

Telecom and ISP solutions provider for enterprise clients.

- Supported Cisco-based WAN and campus network infrastructure.
- Monitored fiber and radio uplinks, configured failover scenarios, and ensured link stability.
- Executed physical installations, structured cabling, link testing, and vendor coordination.
- Assisted with troubleshooting network outages and performance issues.

Trainee Engineer
PTCL – Lahore, Pakistan

Jan 2014 – Oct 2014

Pakistan's largest telecommunications provider, serving millions nationwide in partnership with Etisalat.

- Supported network rollout, DSL installations, and on-site fault resolution.
- Maintained wiring schematics, switch logs, and technical site documentation.
- Assisted senior engineers with network operations and troubleshooting.

EDUCATION

Bachelor of Science (BSc) in Electrical (Telecommunication) Engineering

COMSATS Institute of Information Technology – Lahore, Pakistan

- CGPA: **3.47 / 4.00**
- Bronze Medalist – **3rd Position Overall**

CERTIFICATIONS
